REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: claim 1 is patentable over the prior art patents and printed publications because of the specific arrangement of the set of stacked recording media provided in a package, the set of stacked recording media includes an image-receiving sheet having an image-receiving layer which is fed to a recording medium holding member and a plurality of transfer sheets each having a toner layer which are successively fed to the recording medium holding member so that the toner layer of each transfer sheet may be brought into contact with the image-receiving layer of the image-receiving sheet, said image-receiving sheet and said transfer sheets being stacked in order of feed to the recording medium holding member, the package further includes an interleaved sheet inserted between every adjacent recording media, each of the interleaving sheets extending outward from at least one side of the set of recording media, and wherein each of the interleaving sheets has at least one perforation in the extension thereof, and the interleaving sheet is fixed to a recording apparatus using said perforation. The combined limitations are not taught by the art of record alone or in combination.

Claim 11 is patentable over the prior art patents and printed publications because of the specific arrangement of the set of stacked recording media provided in a package loaded into a feed cassette, wherein said interleaving sheet extends outward from the side of the set of recording media opposite to the side where a pickup

mechanism of a recording apparatus is applied. The combined limitations are not taught by the art of record alone or in combination.

Claim 18 is patentable over the prior art patents and printed publications because of the specific arrangement of the set of stacked recording media provided in a package loaded into a feed cassette, wherein the recording media stick out from the side of said interleaving sheets where a pickup mechanism of a recording apparatus is applied, which is not taught by the art of record alone or in combination.

Claims 19 and 28 are patentable over the prior art patents and printed publications because of the specific arrangement of the set of stacked recording media provided in a package loaded into a feed cassette, wherein the body of the feed cassette has a member for fixing the extension of the interleaving sheets, which is not taught by the art of record alone or in combination.

Claims 2-4, 8-10, 12-14, 20-27 are allowed because they are directly or indirectly dependent from claims 1 and 11 above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
